Date of Production of the KID	04.09.2026 (00:47:22)

You are about to purchase a product that is not simple and may be difficult to understand.

WHAT IS THIS PRODUCT?

► TYPE

The product is issued as uncertificated security under Swiss Law. Apart from the form and establishment of the product, all rights and obligations arising from it shall be determined in all respects in accordance with French law. It has no capital protection against market risk.

► TERM

The product does not have a fixed term. It may be exercised by the investor or terminated by the Issuer.

► OBJECTIVES

Objective of the product is to provide you with a specified return, if any, according to predefined conditions. You will participate in a leveraged manner in any price trend of the Underlying.

The product can expire early during its lifetime if a Knock-Out Event occurs. A Knock-Out Event occurs if the Price of the Underlying is at or above the Relevant Strike at any time during the Observation Period. In this case the product becomes worthless immediately.

You may request the Issuer to redeem the product early by exercising your Warrant Right upon delivery of a prior written exercise notice on predefined dates (each an Exercise Date and a Valuation Date).

Furthermore, the Issuer has the right to terminate the product on a date designated at its discretion subject to prior notification (Termination Date and Valuation Date).

After exercise of your Warrant Right or upon termination by the Issuer and unless a Knock-Out Event has occurred before, you will receive a Redemption Amount on the relevant Settlement Date which equals the amount by which the Reference Price is below the Relevant Strike, divided by the Ratio

- have a short-term investment horizon (up to three years).
- seek to invest in a capital growth product, potentially to diversify their overall portfolio.
- have been informed or have sufficient knowledge of the financial markets, their functioning and their risks, and the asset class of the Underlying.

WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

RISK INDICATOR

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 7 out of 7, which is the highest risk class.

This rates the potential losses from future performance at a very high level, and poor market conditions are very unlikely to impact our capacity to pay you.

To the extent the currency of the country in which you purchase this product or the account to which payments on this product are credited differs from the Currency of the Product, please be aware of the currency risk. You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies.

This product does not include any protection from future market performance, so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

For detailed information about all risks please refer to the risk sections of the Base Prospectus as specified in the section "Other relevant information" below.

PERFORMANCE SCENARIOS

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The scenarios shown are illustrations based on results from the past and on certain assumptions. Markets could develop very differently in the future.

Recommended holding period		Sample period (1 calendar day)
Example Investment		CHF 10,000.00
		If you exit after 1 day
Minimum Scenario	There is no minimum guaranteed return. You could lose some or all of your investment	
Stress scenario	What you might get back after costs	CHF 0.00
	Percentage return (not annualized)	-100.00%
Unfavourable scenario	What you might get back after costs	CHF 0.00
	Percentage return (not annualized)	-100.00%
Moderate scenario	What you might get back after costs	CHF 5,476.00
	Percentage return (not annualized)	-45.24%
Favourable scenario	What you might get back after costs	CHF 11,796.00

► COSTS OVER TIME

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- You would get back the amount that you invested (0 % annual return).
- CHF 10,000.00 is invested

If you exit after 1 day	
Total costs	CHF 3,525.00
Cost impact *	35.25%

* This illustrates the effect of costs over a holding period of less than one year. This percentage is calculated considering the aggregated cost in the period divided by the investment amount and cannot be directly compared to the cost impact figures provided for other products.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

► COMPOSITION OF COSTS

One-off costs upon entry or exit		If you exit at the end of the sample period (1 calendar day)
Entry costs	30.71% of the amount you pay in when entering this investment. These costs are already included in the price you pay.	CHF 3,071.00
Exit costs	4.30% of the investment amount. These costs only apply if you exit your investment prior to the maturity of the product. The number indicated assumes that normal market conditions applies.	CHF 430.00
Ongoing costs		
Management fees and other administrative or operating costs	0.24% of the value of your investment related to the Recommended Holding Period. This is an estimate based on actual costs.	CHF 23.57

HOW LONG SHOULD I HOLD IT AND CAN I TAKE MONEY OUT EARLY?

Recommended holding period: 1 calendar day (sample period)

The recommended holding period indicated above corresponds to the sample period which was used to calculate the performance scenarios and costs of the product. Due to its leverage effect the product reacts to the smallest price movements of the Underlying, leading to profits or losses within unpredictable timeframes. For investors seeking a return, the risk related to the product increases considerably if they hold the product for longer than the sample period. For investors purchasing the product for hedging purposes the holding period depends on the hedging horizon of the individual investor.

In addition to selling the product off-exchange you may ask the Issuer for early redemption of the product by exercising your Warrant Right upon delivery of a prior written notice on predefined days. Please note that you may be required to hold a minimum number of products greater than one for effective exercise. You must instruct your depository bank, which is responsible for the order of the transfer of the specified products. Upon effective exercise you will receive a Redemption Amount as described in more detail under "What is this product?" above.

Under normal market conditions, you may sell this product in the secondary market, at a price depending on the markets parameters prevailing at the time, which could put the invested amount at risk.

Please be aware that trading of the product may cease prior to the Valuation Date.

In unusual market situations, or in the event of technical faults/disruptions, a purchase and/or sale of the product can be temporarily hinder
